[27.03.2025, 20:46:45] D.P.:
Since my English is limited, I may not fully understand what you said,
so let me write it down to clarify:

- For December, I received my salary on 07.01.2025: $3,188.08
- For January, I received my salary on 04.02.2025: $1,489.25.
  I assume $110 was deducted for taxes-is that correct?
  We left here $1,600.
- For February, I received my salary on 26.03.2025: $3,071.31.
  I assume $130 was deducted for taxes-is that correct?

For my March salary, I should receive $3,200 (March salary) + $1,600 (remaining from February), which totals $4,800, correct?

Also, I remember you mentioned a salary increase, but I haven't included that in my calculation

[28.03.2025, 05:06:16] C.W.:
This is correct your fo alt calculation plus an extra $150 bonus.
